ABOUT US

At KDCD Hospitality & Medical Supplies, we identified a serious challenge facing the hospitality industry, mosquitoes, bed bugs, and other pests affecting guests' comfort, health, and your property's reputation. Too often, beautiful beds lacked the built-in protection needed for a truly safe and restful stay.

We created a unique bed and linen range that directly solves this problem. Every KDCD bed and set of linen is treated with advanced protection against:

- Mosquitoes - reducing the risk of bites and disease
- Bed bugs - protecting guests and your investment
- Head lice - ensuring the highest hygiene standards

What truly sets us apart is our ability to design beds to your exact specification. Whether you need Bonnell spring, pocket spring, foam, or hybrid designs, we create them in any size, style, or finish to suit your lodge, hotel, or resort. Paired with our premium, treated lodge-grade linen, you get a complete sleep solution that's luxurious, durable, and protected.

At KDCD, we don't just supply beds and linen we deliver customised comfort and peace of mind.

MORE THAN JUST BED DESIGN

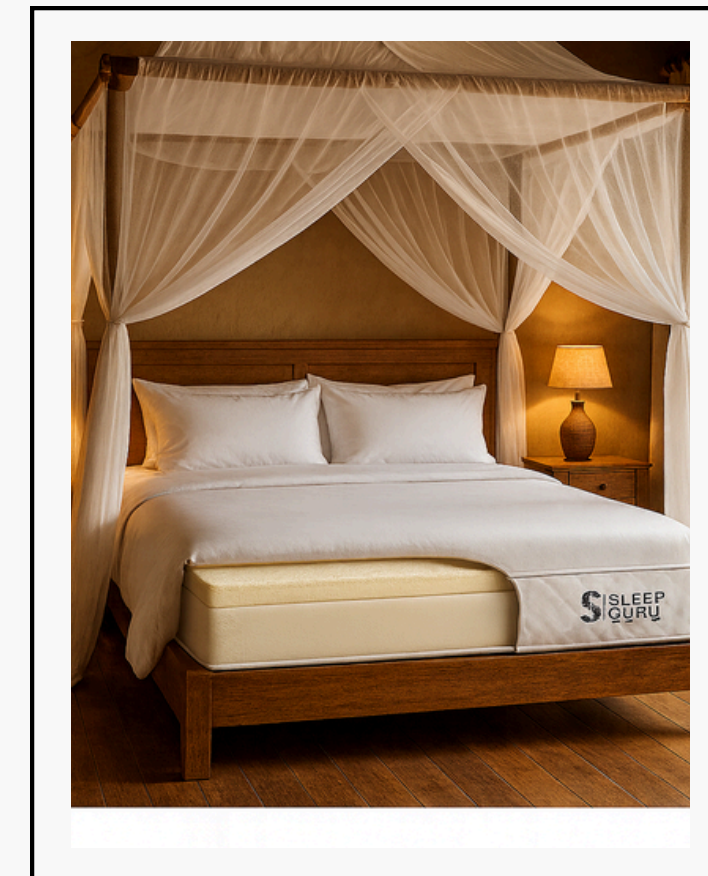

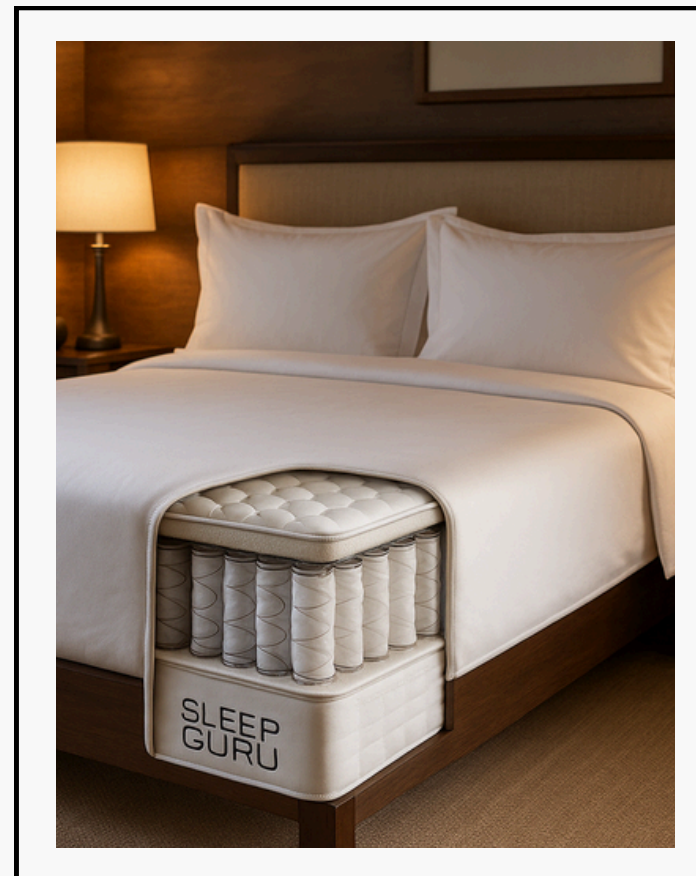

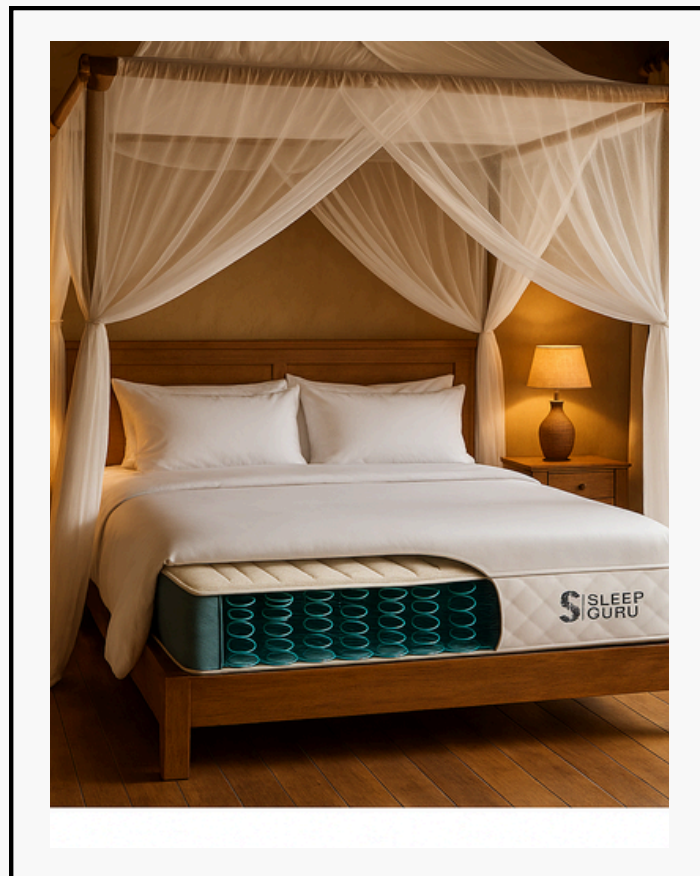

At KDCD, we've reimagined what a perfect night's sleep should be. Our exclusive bed range is not only designed for luxury and durability but also treated with advanced anti-bed mite, anti-head lice, and anti-mosquito protection ensuring your guests sleep in comfort and peace, night after night.

Every bed is custom-made to your specifications, giving you complete flexibility in style, size, and comfort. Choose from Bonnell Spring, Pocket Spring, or Memory Foam designs or combine elements to create your own unique comfort profile.

From the frame to the finish, our beds are engineered for long-lasting performance in high-use environments like lodges, hotels, and resorts while still offering the premium comfort your guests deserve.

Why choose our beds?

- Custom design to match your décor and comfort needs.
- Built-in insect protection for hygiene and peace of mind.
- Choice of spring or foam systems for tailored support.
- Durable construction ideal for hospitality environments.

IMPORTANTANTS OF BEDS

In a lodge, the bed is more than furniture it's an investment in your guests' comfort and your reputation. Our beds are built for quality and longevity, crafted to your exact specifications, and treated to protect against bed mites, head lice, and mosquitoes. Every guest sleeps on premium comfort, knowing their rest is as safe as it is luxurious.

LINEN RANGE

Our Linen Luxury with Built-In Protection

Our hospitality-grade linen, pillows, and duvet inners are crafted from premium fabrics for a crisp, elegant look and soft, breathable comfort. Designed for the demands of hotels, lodges, and resorts, every item is made to last wash after wash.

What sets our products apart is the advanced treatment impregnated directly into the fabric during production. This invisible, permanent barrier offers long-term protection against bed mites, head lice, and mosquitoes without affecting the softness or breathability of the material.

How does it protect your clients?

The treatment works by creating an environment that is inhospitable to these pests. Mosquitoes are deterred from landing, bed mites and head lice cannot thrive or breed, and the risk of bites, irritation, and allergic reactions is dramatically reduced. Your guests sleep peacefully, knowing their bedding is not only comfortable but also a shield against common hospitality pests.

With exceptional durability, timeless white-on-white elegance, and the option to customise sizing and branding, our range combines style, comfort, and peace of mind protecting your reputation while protecting your guests.

THE LINEN COLLECTION

Linen

Duvet Inners

Pillows

Mattress & Pillow
Protectors

Our luxury lodge linen combines five-star comfort with built-in protection.

In a luxury lodge, every detail matters including what your guests sleep on. Our premium white linen, pillows, and duvet inners are crafted for lasting comfort and elegance. Treated with an invisible barrier against bed mites, head lice, and mosquitoes, the protection is locked into the fibres and stays effective wash after wash. Guests enjoy fresh, soft luxury and the peace of mind that they're sleeping safely.
